

To: The Federal Communications Commission

Satellite radio is a refreshing alternative to the generally poor programming of conventional radio. Satellite radio offers a great variety of programming that is high quality and free from the bias, profanity, and trash that pervades general radio. If you accept the National Association of Broadcasters petition (04-160) it will mean that they will have free reign to continue to offer poor programming without fear of competition. This country thrives on innovation and competition, please do not accept this petition.
